STI Manufacturing, Inc.
P. O. Box 2087
Willis, TX 77378

GENTLEMEN:

Just a note of appreciation for all your help in the design and construction of a prototype RTD assembly for the carbonylation reactor.

Because of the quick reaction of STI, the RTD assembly arrived in time for our Assistant Project Manager, Peter Gilchrist, to take the assembly to Germany. The response of the Germany company building the reactor thermowell to the STI RTD was excellent.

Thanks to your efforts, we now have a solid design for our carbonylation reactor RTD assemblies. The BHC Company values the service and product your company offers. I am certainly looking forward to continued relationship with STI on this project.

Sincerely,

A handwritten signature in black ink, appearing to read 'Jim Fugitt', written in a cursive style.

Jim Fugitt
